This Brief explores the role of social crime prevention as a crime reduction strategy in the developing world. "Social crime prevention" focuses on the social and economic factors that may contribute to violence and criminal behavior in a community. Particularly in the developing world, an understanding of the socioeconomic and political context holds long-term potential for crime reduction (rather than crime displacement); however, the strategies are complex and the results may be slow. Generally, police and law enforcement are relied upon to present quick results, where social crime prevention strategies can be viewed as being "soft on crime" or too slow. This Brief discusses the tension between the traditional role of police and proactive social crime prevention strategies in an international context, through a variety of case studies. It also provides recommendations for

balancing or reshaping this role. This work will be of interest to researchers and policy makers interested in crime prevention, particularly in the developing world, criminal theory, police studies and related disciplines such as demography, sociology and political science.

The criminal justice process is dependent on accurate documentation. Criminal justice professionals can spend 50-75% of their time writing administrative and research reports. Report Writing for Criminal Justice Professionals, Fifth Edition provides practical guidance--with specific writing samples and guidelines--for providing strong reports. Much of the legal process depends on careful documentation and the crucial information that lies within, but most law enforcement, security, corrections, and probation and parole officers have not had adequate training in how to provide well-written, accurate, brief, and complete reports. Report Writing for Criminal Justice Professionals covers everything officers need to learn--from basic English grammar to the difficult but often-ignored problem of creating documentation that will hold up in court. This new edition is updated to include timely information, including extensive coverage of digital reporting, updates on legal issues and privacy rights, and expanded coverage of forensics and scientific reporting. This comprehensive reader exposes students to both the classic and contemporary theories of crime. Editors Francis T. Cullen, Robert Agnew, and Pamela Wilcox provide brief yet detailed introductions, preparing students for what they are about to read and placing each reading in context.

Concise yet thought provoking, this text helps you learn about the structure and function of Canada's Criminal justice system and introduces such things as community policing, the role communities play in criminal justice, restorative justice, victims of crime in the criminal justice process and Aboriginal peoples and criminal justice.

What survives of the notions, principles and values of critical criminology? Faced with contexts that could not be more dramatically different to those fostering critical approaches to crime and its control, what is left of the radical theories and practical initiatives that characterized it in the 1970s? This book argues that critical criminology today can be reimagined if new concepts are elaborated, which bring academic efforts close to the practices of social movements. Building on an original collection of anti-hegemonic essays focused on specific criminological areas, including femicide, organized crime, drug use, punishment, state-corporate terrorism and financial crime, this book identifies the radical potential inherent in the choice of areas, topics and variables that critical criminologists can address today. In discussing concepts of distance, power, mercy and troublemaking, this book considers the relationship between critical criminology, social justice and activism. An accessible and compelling read, this book will appeal to all those engaged with critical criminology, sociology and cultural studies.
