As you travel Africa, you will find the way of ubuntu – the universal bond that connects all of humanity as one. At the age of twenty-eight, while sitting in a friend’s backyard in the remote mining township of Jabiru, Heather Ellis has a light-bulb moment: she is going to ride a motorcycle across Africa. The idea just feels right – no matter that she’s never done any long-distance motorcycle travelling before, and has never even set foot on the African continent. Twelve months later, Heather unloads her Yamaha TT600 at the docks in Durban, South Africa, and her adventure begins. Her travels take her to the dizzying heights of Mt Kilimanjaro and the Rwenzori Mountains, to the deserts of northern Kenya where she is befriended by armed bandits and rescued by Turkana fishermen, to a stand-off with four Ugandan men intent on harm, and to a voyage on a ‘floating village’ on the mighty Zaire River. Everywhere she goes Heather is aided by locals and travellers alike, who take her into their homes and hearts, helping her to truly understand the spirit of ubuntu – a Bantu word meaning ‘I am because you are’.

Ubuntu is the extraordinary story of a young woman who, alone and against all odds, rode a motorcycle to some of the world’s most remote, beautiful and dangerous places. ‘Most of us wouldn’t take a motorcycle solo through Africa. Or remember much about what we were saying, smelling, believing or hoping twenty years ago. Heather Ellis did that, and has written a remarkable book about it too. She tells her story vividly and

honestly, taking us through fields, national parks, into towns and down red-mud tracks, meeting other travellers and working with locals, eating rice and fish, honing her self-belief and increasing our respect for her with every day on the road. This is a really fascinating and compelling tale, told well. For anyone who has ever doubted themselves, Ubuntu has a message: there is a way through, down a road you haven't travelled yet.' —Kate Holden, author of *In Her Skin* 'No two big journeys are alike, and Heather Ellis' could not have been more different to mine, but certain fundamental similarities seem to unite us all, from the prosaic –'My bike was dangerously overloaded' – to the sublime awakenings that such journeys engender. Hers was a great adventure into the soul of Africa, a thrilling story of endurance and self-discovery, told with care, intelligence and deep humanity. It is beautifully written and a pleasure to read. So read it.' —Ted Simon, author of *Jupiter's Travels* 'In the 1990s Heather had an impulsive idea to ride a motorcycle through Africa and, through perseverance, made this come true. Her story is not just a very detailed, descriptive account of the countries she rode through but also of the problems she faced and overcame. It reveals her ability to communicate with people of all nationalities and walks of life, learn from them and find that if you have faith in the Universe, it will provide. Very well written and immensely readable.' —Linda Bootherstone-Bick, author of *Into Africa with a Smile* 'Ever wondered what your life would look like if you chose to trust rather than fear? Heather Ellis does just this as she rides a motorbike across Africa. She discovers a

land torn apart by war and poverty but also a land rich in beauty and kindness. Reading this book is challenging and inspiring. Heather's journey will stay with you long after you finish her story.' —Maggie Mackellar, author of *When It Rains & How to Get There*

'Ubuntu is an inspiring memoir about an extraordinary journey taken by an exceptional woman. Heather Ellis writes about her most daring adventures and deepest struggles with humour, heart, guts and grace. I was enthralled by every page.' —Cheryl Strayed, author of *Wild*

Jeremy Kroeker has travelled to nearly 30 countries with his motorcycle and done at least one outrageously stupid thing in every one. One October he rode from Canada to Panama in an attempt to flee the pain of a broken relationship.

Motorcycle Therapy—A Canadian Adventure in Central America rumbles with comic adventure as two men, fleeing failed relationships, test the limits of their motorcycles and their friendship. Join the horn-honking, signal-flashing, wheeliepopping pair as they endure painful bee stings, painful snakebites and

(when they talk to girls) painful humiliation.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Includes weekly cumulative indexes.

The stories within are all events of my life pertaining to motorcycles and motorcycle travel. Many of them are with my dad and show the unique friendship that we have been lucky enough to share. Some of them are with friends, both past and current. I hope that all of them depict my love for motorcycles, motorcycle travel and for my fellow motorcyclists. I believe that motorcyclists are

some of the most adventurous, kind hearted and determined people I have even known and witnessed. I hope that you the reader will be able to put yourself in the saddle and enjoy the ride almost as much as I did. In volume one we travel all over western North America on a wide variety of bikes. In future volumes I hope to be able to tell the tales of travel all over the planet. I hope you enjoy!

This "how to" guide shows small to mid-sized local governments, whether in urban or regional settings, how to develop comprehensive emergency management plans with minimal expenditure of resources. Its modular, step-by-step approach also makes it an effective guide for non-experts and those interested in self-study. The book covers both preparedness planning and actual emergency management and includes these helpful features: Uses a modular approach to developing written plans, starting with the Preparedness Plan at the federal, provincial/state levels. At its core is the Emergency Management Plan, which is essentially the establishment and operation of the Emergency Operations Center that is central to any emergency. Instructions also cover other common plans: 1) Emergency Social Services 2) Emergency Public Information 3) Emergency Telecommunications 4) Evacuation 5) Hazard-Specific 6) Mutual Aid Agreements Takes novice emergency planners step-by-step through the four complete processes of mitigation, preparedness, response, and recovery for

natural and human-made disasters. Gives tips for a staff training matrix and for developing a timetable of graduated exercises to test the written plan. Includes checklists, summaries, plan outlines, glossary, appendices that list online resources, and suggestions for career and professional development.

Untangling Smart Cities: From Utopian Dreams to Innovation Systems for a Technology-Enabled Urban Sustainability helps all key stakeholders understand the complex and often conflicting nature of smart city research, offering valuable insights for designing and implementing strategies to improve the smart city decision-making processes. The book drives the reader to a better theoretical and practical comprehension of smart city development, beginning with a thorough and systematic analysis of the research literature published to date. In addition, it provides an in-depth understanding of the entire smart city knowledge domain, revealing a deeply rooted division in its cognitive-epistemological structure as identified by bibliometric insights. Users will find a book that fills the knowledge gap between theory and practice using case study research and empirical evidence drawn from cities considered leaders in innovative smart city practices. Provides clarity on smart city concepts and strategies Presents a systematic literature analysis on the state-of-the-art of smart cities' research using bibliometrics combined with practical applications Offers a comprehensive
