"We need books like this one." --Steven Pinker At last, stupidity explained! And by some of the world's smartest people, among them Daniel Kahneman, Dan Ariely, Alison Gopnik, Howard Gardner, Antonio Damasio, Aaron James, and Ryan Holiday. And so I proclaim, o idiots of every stripe and morons of all kinds, this is your moment of glory: this book speaks only to you. But you will not recognize yourselves... Stupidity is all around us, from the coworker who won't stop hitting "reply all" to the former high school classmate posting conspiracy theories on Facebook. But in order to vanquish it, we must first understand it. In *The Psychology of Stupidity*, some of the world's leading psychologists and thinkers--including a Nobel Prize winner and bestselling authors--will show you... • why smart people sometimes believe in utter nonsense; • how our lazy brains cause us to make the wrong decisions; • why trying to debate fools is a trap; • how media manipulation and Internet overstimulation make us dumber; • why the stupidest people don't think they're stupid. The wisdom and wit of these experts are a balm for our aggrieved souls and a beacon of hope in a world of morons.

"Intention is a force in the universe, and everything and everyone is connected to this invisible force." Intention is generally viewed as a pit-bull kind of determination, propelling one to succeed at all costs by never giving up on an inner picture. In this view, an attitude that combines hard work with an indefatigable drive toward excellence is the way to succeed. However, intention is viewed very differently in this book. Dr. Wayne W. Dyer has researched intention as a force in the universe that allows the act of creation to take place. This book explores intention-not as something you do-but as an energy you're a part of. We're all intended here through the invisible power of intention. This is the first book to look at intention as a field of energy you can access to begin co-creating your life! Part I deals with the principles of intention, offering true stories and examples showing how to make the connection. Dr. Dyer identifies the attributes of the all-creating universal mind of intention as creative, kind, loving, beautiful, expanding, endlessly abundant, and receptive, explaining the importance of emulating this source of creativity. In Part II, Dr. Dyer offers an intention guide with specific ways to apply the co-creating principles in daily life. Part III is an exhilarating description of Dr. Dyer's vision of an individual connected at all times to the universal mind of intention.

Leading neuroscientists and architects explore how the built environment affects our behavior, thoughts, emotions, and well-being. Although we spend more than ninety percent of our lives inside buildings, we understand very little about how the built environment affects our behavior, thoughts, emotions, and well-being. We are biological beings whose senses and neural systems have developed over millions of years; it stands to reason that research in the life sciences, particularly neuroscience, can offer compelling insights into the ways our buildings shape our interactions with the world. This expanded understanding can help architects design buildings that support both mind and body. In *Mind in Architecture*, leading thinkers from architecture and other disciplines, including neuroscience, cognitive science, psychiatry, and philosophy, explore what architecture and neuroscience can learn from each other. They offer historical context, examine the implications for current architectural practice and education, and imagine a neuroscientifically informed architecture of the future. Architecture is late in discovering the richness of neuroscientific research. As scientists were finding evidence for the bodily basis of mind and meaning, architecture was caught up in convoluted cerebral games that denied emotional and bodily reality altogether. This volume maps the extraordinary opportunity that engagement with cutting-edge neuroscience offers present-day architects. Contributors Thomas D. Albright, Michael Arbib, John Paul Eberhard, Melissa Farling, Vittorio Gallese, Alessandro Gattara, Mark L. Johnson, Harry Francis Mallgrave, Iain McGilchrist, Juhani Pallasmaa, Alberto Pérez-Gómez, Sarah Robinson

100 Ways To Screw Up Your Life? Yes! Believe it or not, I did any of those 100. In fact, we all did many of them, only not for enough time to really screw things up. That doesn't mean we can't do it now. Having a lists of things to avoid in order to live a better life is more than often easier than having a list of things to do. We, as living human beings, seem to be more sensitive to interdiction than to incentives.

Using approaches from the Hebrew interpretive tradition to discern the actual events surrounding Jesus' death, Bishop Spong questions the historical validity of literal narrative concerned the Resurrection. He asserts that the resurrection story was born in an experience that opened the disciples' eyes to the reality of God and the meaning of Jesus of Nazareth. Spong traces the Christian origins of anti-Semitism to the Church's fabrication of the ultimate Jewish scapegoat, Judas Iscariot. He affirms the inclusiveness of the Christian message and emphasizes the necessity of mutual integrity and respect among Christians and Jews.

*Flying Star Feng Shui* adds a new "time dimension" to feng shui practice reflecting the fact that the subtle energies present in our living environment are constantly changing. The flying star combinations make it possible to respond to-or prepare for-these changing energy "situations." These methods produce impressive and rapid results and can both shorten periods of bad luck, while initiating or prolonging periods of good fortune. These concepts have previously been available only from a few untranslated or highly technical sources. Author Stephen Skinner has an international reputation as a popularizer of feng shui concepts for Western readers. In *Flying Star Feng Shui* he introduces one of the most effective and popular aspects of feng shui practice today.

Cities need forests. The network of woodlands, groups of trees and individual trees in a city and on its fringes performs a huge range of functions – such as regulating climate; storing carbon; removing air pollutants; reducing the risk of flooding; assisting in food, energy and water security; and improving the physical and mental health of citizens. Forests enhance the look of cities and play important roles in social cohesion; they may even reduce crime. This edition of *Unasylva* takes a close look at urban and peri-urban forestry – its benefits, pitfalls, governance and challenges.

Jayne Bartett, the feng shui consultant to the rich and powerful of Beverly Hills, has written the most comprehensive and life-changing book on the subject.

*The History of Feng Shui* tracks the evolution of feng shui in detail from China in 221 BC until the present day, both in China, and later in the West. This has never been done before in English. The only information on the history of feng shui occurs as scattered chapters in a number of books which often repeats the same vague and sometimes erroneous generalisations. These books include many erroneous statements such as: 1. "feng shui is 6000 years old." In fact the characters 'feng shui' were not used in this context before 320 CE. Even the older names (ti li, kan yu) for this practice do not occur in any texts before 220 BCE. 2. "feng shui derives from the Yi Jing." In fact, apart from the 8 trigrams being used as basic directional indicators, no feng shui compass shows 60 hexagrams till 1600 CE, and not the full 64 hexagrams till 1827 CE. 3. "the feng shui compass derives from a revolving magnetised spoon revolving on a plate." This incorrect deduction made by Wen Cheng To in 1946 (and later reluctantly repeated by Needham) was completely discredited in the 1990s, but people keep repeating it. This book has been meticulously researched, from authoritative Chinese texts and the analysis of many antique lo p'ans. It contains the details of many masters, and tracks the changes in theory and practice over time. There are modern chapters on feng shui in Singapore, Hong Kong, Taiwan, US and UK, bringing it totally up to date. Stephen Skinner introduced feng shui to the West with the first 20th century English book on feng shui in 1976. With the publication from 1998-2001 of the magazine "Feng Shui for Modern Living" in English and also in Chinese, Stephen has helped to spread interest in feng shui worldwide and outside of the Chinese speaking world. As interest has progressed further, there are now many more Westerners who not only know what traditional feng shui is, but also want to know how to use it practically. Feng shui is not a religion, but a discipline as precise in its practice as surveying, and more precise in its application and formulae than many Western sciences (such as psychology and sociology). Its history is therefore worthy of our attention. Stephen also documented the rings of the luopan in his comprehensive "Guide to the Feng Shui Compass: a Compendium of Classical Feng Shui." He has been a prime mover in both establishing feng shui as a precise discipline, and in bringing its benefits to the English speaking world.
