"Everyday Content-Area Writing shows intermediate-grade teachers how to integrate writing into daily instruction and use it as an authentic, engaging tool that will develop deeper content-area understanding. Kathleen Kopp's fun and creative, write-to-learn strategies span the gamut of math, science, and social studies to show you how to make writing a time-saving, valuable part of your instructional day. Everyday Content-Area Writing includes: •strategies to build background; foster review, follow-up, and practice through individual and group activities; and teach content-area vocabulary; •note-taking tactics, organizational methods, and ways to save time while bringing meaning to learning; •explanations and guidelines for formative assessments that guide instruction and summative, post-unit assessments that evaluate student learning; •original ideas for incorporating technology inside and outside the classroom, publishing student work, and differentiating instruction; and •tips for establishing a supportive writing environment. Suggested writing resources, ready-to-go templates, unit assessment plans, sample projects, and prompts round out this resource."

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.
