The James Bond Cold Reading is a whole new take on the twelve lines of the 'Classic Reading' made so popular from the 50's to the present day. Julian 'Bev' Moore shows you how this much discussed but seldom used powerful cold reading technique can be applied effectively and memorised in no time at all using characters such as James Bond that you already know and love. Forget about learning stock lines and never using them - using the proven techniques in The James Bond Cold Reading, you can learn to speak in your own words and amaze people by how much you know about them using one of the most misunderstood tools of mentalism - the character reading. By bringing a modern slant to an old technique, Julian 'Bev' Moore proves once again that that the old ones are the best - if only we knew how to apply them. If you're not a fan of 'stock lines' and think that learning them is a waste of time, this ebook could seriously change your mind! REVIEWS "I got Julian's book and it is wonderful! It is a great system for doing a reading and extremely practical. I applaud Julian and highly recommend this!" - Richard Osterlind "First palmistry, now general Forer-Barnum 101... this guy really amazes me." - Craig Browning "Julian has taken the Classic Reading - which isn't out of date, as some would suggest - and applied a James Bond theme to its LEARNING (not to the reading itself), to make the reading's customization so much easier. It's ingenious, simple, and thought-inspiring, all at the same time! Buy this now, and start using it right away!" - R. Lee Davis "I have tried many times to learn the stock lines of cold reading. I've tried memory techniques, linking, the peg system, and even with all that everything seemed a confusing, repetitive mess. Because of Julian's system, in two days, I have learned to give a cold reading forward, backward, inside out and in my own words. Just as with Julian's palmistry book saved me about five years of study, this book is just as good and also very interesting. If you're interested in cold reading at all this will be the best money you'll ever spend. As a side note his system could be applied to anything else you might want to memorize and make your own. I have never heard of his techniques before and I have studied a lot of memory techniques. It's so easy I will add this to my 'readings' repertoire." - Scott Martisse "So I'm finally watching the new Casino Royale and lines from the James Bond Reading keep popping unbidden into my head. What makes this interesting is I hadn't really intended on learning the reading via James Bond but via a character I know more about. I followed Julian's suggestions to practice readings aloud, even to inanimate objects. After a bit of this, I tried the real deal. This isn't something you can do mechanically, at least if you want to get maximum effect and responses. It is a matter of a give and take that is "entrancing" in its impact. I can't wait to see what more experience will bring. Thank you Julian, you really have made a significant contribution. Your ability to simplify and teach is exceptional. I generally rely on my knowledge as a psychologist to add a bit of reading but it wasn't anywhere as powerful as applying this system. Folks, don't just read JBR. Get out there and use it." - Dr Bill Cushman OTHER KINDLE BOOKS IN THE SPEED LEARNING SERIES BY JULIAN MOORE Speed Learning: Graphology - The Art Of Handwriting Analysis Speed Learning: Cartomancy - A Playing Card Reading Primer Speed Learning: Palmistry - Palm Readings In Your Own Words Speed Learning: Numerology - Numbers Past And Present With The Lo-Shu Square Speed Learning: Star Signs

The Colosseum was Imperial Rome's monument to warfare. Like a cathedral of death it towered over the city and invited its citizens, 50,000 at a time, to watch murderous gladiatorial games. It is now visited by two million visitors a year (Hitler was among them). Award winning classicist, Mary Beard with Keith Hopkins, tell the story of Rome's greatest arena: how it was built; the gladiatorial and other games that were held there; the training of the gladiators; the audiences who revelled in the games, the emperors who staged them and the critics. And the strange after story - the Colosseum has been fort, store, church, and glue factory.

Whiz Mob is David W. Maurer's classic study of the world of pickpockets. Similar to his best-known work, The Big Con, in Whiz Mob Maurer explains the colorful expressions and vivid words used by pickpockets and uses them to provide a window into the life and experiences of the professional criminal. Although he is quick to point out that he never had any actual experience on the racket, Maurer spent many years interviewing pickpockets and learning about their way of life. The result is a fascinating look at the work, lives, morals, and dangers of this element of the criminal subculture. Whiz Mob is essential reading for sociologists, linguists, and everyone interested in the mystery and intrigue of the criminal underworld.

Nothing is ever written down or said, no actual mentalism or magic gimmicks techniques or subtleties are used. With no fishing, no Barnum statements, and again no magic ploys used whatsoever.

The Google Generation examines original and secondary research evidence from international sources to determine whether there is a younger generation of learners who are adopting different styles of information search behaviour from older generations as a function of their patterns of use of online technologies. The book addresses the questions: might the widespread availability and use of search engines, such as Google, give rise to a different type of scholar who seeks out and utilises online information sources and thereby develops a different orientation to learning from older generations whose information seeking practices became established initially in the offline world. Provides a one of the most comprehensive analyses yet on the evolving nature of information search behaviour Combines a review of a wide range of international research evidence combined with original, cutting edge research Directed towards industry end-users and policy makers as well as academics with shared scholarly interests

The original "9/11 Revealed" attracted lavish praise from reviewers in the "Daily Mail" and "Sunday Times" for the "huge gaps" it exposed in the official 9/11 story, despite a wall of silence by the broadcast media and condemnation in a special webpage set up by the U.S. State Department. Since then the story has produced many sinister new twists, including: - Pentagon whistleblowers have accused the "Independent 911 Commission" of lying - Long-suppressed eyewitness testimony has been released confirming multiple explosions in the Twin Towers before and during their collapses - Seismic evidence confirming three major unexplained events before each plane hit the World Trade Center and before the collapse of building seven - The much-vaunted video supposedly showing that Flight 77 hit the Pentagon showed nothing at all - Analysis of terrorist trials and arrests since 2001 indicates that far from the "600 Al Qaeda sleeper cells in the U.S." (CIA) there were none at all As the 9/11 truth movement enters the mainstream "9/11 Revealed: The New Evidence" is the primary source for accurate information.

An esteemed scientist's personal journey from skepticism to wonder and awe provides astonishing answers to a timeless question: Is there life after death? Are love and life eternal? This exciting account presents provocative evidence that could upset everything that science has ever taught. Daring to risk his worldwide academic reputation, Dr. Gary E. Schwartz, along with his research partner Dr. Linda Russek, asked some of the most prominent mediums in America -- including John Edward, Suzane Northrup, and George Anderson -- to become part of a series of extraordinary experiments to prove, or disprove, the existence of an afterlife. THE AFTERLIFE EXPERIMENTS This riveting narrative, with its electrifying transcripts, puts the reader on the scene of a breakthrough scientific achievement: contact with the beyond under controlled laboratory conditions. In stringently monitored experiments, leading mediums attempted to contact dead friends and relatives of "sitters" who were masked from view and never spoke, depriving the mediums of any cues. The messages that came through stunned sitters and researchers alike. Here, as they unfolded in the laboratory setting, are uncanny revelations about a son's suicide, what a deceased father wanted to say about his last days in a coma, the transformation of a man's lifelong doubts about the afterlife, and, most amazing of all, a forecast of a beloved spouse's death. Dr. Schwartz was forced by the overwhelmingly positive data to abandon his skepticism, reaching some startling conclusions. Compelling from the first page to the last, The Afterlife Experiments is the amazing documentation of groundbreaking experiments you will never forget.

THE #1 NEW YORK TIMES BESTSELLER Millions of readers literally defined their lives through Gail Sheehy's landmark bestseller *Passages*. Seven years ago she set out to write a sequel, but instead she discovered a historic revolution in the adult life cycle. . . People are taking longer to grow up and much longer to die. A fifty-year-old woman--who remains free of cancer and heart disease-- can expect to see her ninety-second birthday. Men, too, can expect a dramatically lengthened life span. The old demarcations and descriptions of adulthood--beginning at twenty-one and ending at sixty-five--are hopelessly out of date. In *New Passages*, Gail Sheehy discovers and maps out a completely new frontier--a Second Adulthood in middle life. "Stop and recalculate," Sheehy writes. "Imagine the day you turn forty-five as the infancy of another life." Instead of declining, men and women who embrace a Second Adulthood are progressing through entirely new passages into lives of deeper meaning, renewed playfulness, and creativity--beyond both male and female menopause. Through hundreds of personal and group interviews, national surveys of professionals and working-class people, and fresh findings extracted from fifty years of U.S. Census reports, Sheehy vividly dramatizes these newly developing stages. Combining the scholar's ability to synthesize data with the novelist's gift for storytelling, she allows us to make sense of our own lives by understanding others like us. *New Passages* tells us we have the ability to customize our own life cycle. This groundbreaking work is certain to awaken and permanently alter the way we think about ourselves. "SHEEHY CLEARLY STATES IDEAS ABOUT LIFE THAT HAVE NEVER BEFORE BEEN AS CLEARLY STATED." --Los Angeles Times Book Review "AN OPTIMISTIC ANALYSIS OF ADULT DEVELOPMENT IN PESSIMISTIC TIMES. . . Now Edward is a magician who works the Haunted Castle in Hollywood and is also on the editorial board of *Skeptic* magazine, where he reveals the means of psychic scamsters. This entertaining book is at once a confessional and instructional regarding human belief and those who exploit it. Both skeptic and skeptical of skepticism, Mark Edward has worked as a 900-number psychic, ghost hunter, and Hollywood Magic Castle medium. He has also worked vigorously to debunk psychic frauds and currently works on the editorial board of *Skeptic* magazine.

Cold reading can be loosely defined as 'how to talk to people so you sound psychic'. This is the definitive guide to how cold reading is used in the psychic industry. It systematically describes a wide range of techniques that enable those who give readings to make seemingly accurate statements to a complete stranger. These statements can refer to past, current or future events or to the client's personality, feelings and potential.This is primarily a descriptive book, not an instructional one. It's primary aim is to describe cold reading techniques rather than to teach anyone how to use them or how to give readings.

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are

found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

Readers will come to understand the basics of the "cold read," which is the psychic's main tool for convincing customers to return

Bestselling author Michael Shermer delves into the unknown, from heretical ideas about the boundaries of the universe to Star Trek's lessons about chance and time A scientist pretends to be a psychic for a day-and fools everyone. An athlete discovers that good-luck rituals and getting into "the zone" may, or may not, improve his performance. A historian decides to analyze the data to see who was truly responsible for the Bounty mutiny. A son explores the possibilities of alternative and experimental medicine for his cancer-ravaged mother. And a skeptic realizes that it is time to turn the skeptical lens onto science itself. In each of the fourteen essays in Science Friction, psychologist and science historian Michael Shermer explores the very personal barriers and biases that plague and propel science, especially when scientists push against the unknown. As always, Shermer delivers a thought-provoking, fascinating, and entertaining view of life in the scientific age.

The long-awaited founding of Valdemar comes to life in this new series from a New York Times bestselling author and beloved fantasist. Within the Eastern Empire, Duke Kordas Valdemar rules a tiny, bucolic Duchy that focuses mostly on horse breeding.

Anticipating the day when the Empire's exploitative and militant leaders would not be content to leave them alone, Korda's father set out to gather magicians in the hopes of one day finding a way to escape and protect the people of the Duchy from tyranny. Kordas has lived his life looking over his shoulder. The signs in the Empire are increasingly dire. Under the direction of the Emperor, mages have begun to harness the power of dark magics, including blood magic, the powers of the Abyssal Planes, and the binding and "milking" of Elemental creatures. But then one of the Duchy's mages has a breakthrough. There is a way to place a Gate at a distance so far from the Empire that it is unlikely the Emperor can find or follow them as they evacuate everyone that is willing to leave. But time is running out, and Kordas has been summoned to the Emperor's Court. Can his reputation as a country bumpkin and his acting skills buy him and his people the time they need to flee? Or will the Emperor lose patience, invade to strip Valdemar of everything of worth, and send its conscripted people into the front lines of the Imperial wars?

"Fascinating and insightful. . . . I cannot recall a book that has made me think more about the nature of thinking." -- Richard C. Lewontin Harvard University Everyone knows that optical illusions trick us because of the way we see. Now scientists have discovered that cognitive illusions, a set of biases deeply embedded in the human mind, can actually distort the way we think. In *Inevitable Illusions*, distinguished cognitive researcher Massimo Piattelli-Palmarini takes us on a provocative, challenging, and thoroughly entertaining exploration of the games our minds play. He opens the doors onto the newly charted realm of the cognitive unconscious to reveal the full range of illusions, showing how they inhibit our ability to reason--no matter what our educational background or IQ. *Inevitable Illusions* is stimulating, eye-opening food for thought.

The world's foremost mentalist demonstrates how to condition mind and body in order to accomplish many of the extraordinary mental feats that Kreskin accomplishes. *The Amazing Kreskin* is a scientist of the mind, relying on natural and scientific means to perform effects that have baffled millions around the world. Natural laws govern the working of the mind, he says. Those who do not understand the laws usually label mental phenomena as supernatural or extrasensory. In fact, few of us have tapped more than a fraction of our mental potential. In this book, he reveals how readers can use their latent mental abilities to enhance the ordinary senses to accomplish effects that resemble telepathy and clairvoyance. Kreskin insists that there is nothing supernatural about any of these effects, and he redefines ESP as extremely sensitive perception to remove all connotation of the other world from this completely natural ability. Kreskin explains how to heighten awareness, increase powers of concentration, discover unknown strengths, tap the power of the unconscious, employ the power of illusion, utilize the power of suggestion, control attitudes and behavior, use silent communication, and predict with educated guesses. He also offers tips on how to hear whispers in a crowded room; predict news stories weeks in advance; read thoughts in the minds of complete strangers; influence others' attitudes and actions; produce hypnotic effects without hypnosis; become a human lie detector; and locate lost objects. Readers will be amazed and amused by what Kreskin can teach them about their own potential.
