"In many ways," Robert J.C. Young writes, "colonization from the very first carried with it the seeds of its own destruction." Imperial Affliction examines some ways in which Young's observation could be applied to problems of subjectivity and influence within the colonizing nations themselves, particularly eighteenth-century Britain. How might these "seeds of destruction" manifest themselves as problems of identity? How might the very selves with greatest access to self-affirmation---the idea of the empire, the idea of British citizenry, the idea of the British self---actually find themselves vulnerable, confused, or damaged? Using multiple forms of postcolonial critique, this book turns back to salient eighteenth-century British lives and work for a different kind of enlightenment. Among its central subjects are the elusive subjectivity of William Collins; the exilic religious experience of William Cowper and its multiple readings in the twentieth century by a self-fashioned exilic, Donald Davie; the "missed encounter" between Christopher Smart and Samuel Johnson, and the ways in which that problem was re-inscribed in the work of W. Jackson Bate and Lionel Trilling; the problem of imperial fixity in James Cook's journals with a view to Gray's "Elegy" and Goldsmith's "Deserted Village"; and the problem of purity as a paradoxically privileged and exilic force in the work of John Newton and Christopher Smart. In these explorations, this book illustrates both an expanded view of eighteenth-century colonial liabilities and a new emphasis on postcolonial critique as a means of exploring the fissures always present in imperial ambition.

This volume of essays examines the ways in which magical practices are found in different aspects of contemporary capitalist societies. From contract law to science, by way of finance, business, marketing, advertising, cultural production, and the political economy in general, each chapter argues that the kind of magic studied by anthropologists in less developed societies – shamanism, sorcery, enchantment, the occult – is not only alive and well, but flourishing in the midst of so-called 'modernity'. Modern day magicians range from fashion designers and architects to Donald Trump and George Soros. Magical rites take place in the form of political summits, the transformation of products into brands through advertising campaigns, and the biannual fashion collections shown in New York, London, Milan and Paris. Magical language, in the form of magical spells, is used by everyone, from media to marketers and all others devoted to the art of 'spin'. While magic may appear to be opposed to systems of rational economic thought, Moeran and Malefyt highlight the ways it may in fact be an accomplice to it.

Melvin B. Tolson is best known as the poet who wrote *The Harlem Gallery* and *Libretto* for the Republic of Liberia. He received national acclaim only toward the end of his life, but early in his career he achieved considerable recognition as a challenging speaker and activist within the black American community. Tolson wrote a weekly column for the *Washington Tribune* from 9 October 1937 to 24 June 1944, entitled "Caviar and Cabbage." As the title suggests, the subjects he treated were various. He perceived the problems of the black world of the late thirties and early forties with the insight of an intellectual and the verbal richness and rhythms of a poet heavily influenced by a strong pulpit tradition. This combination makes the columns valuable both as literature and as cultural history. Robert Farnsworth has selected and edited these columns. His introduction describes their cultural and biographical context. He has arranged the columns according to subject: "Christ and Radicalism," "Race and Class," "World War II," "Random Shots," "Writers and Readings," and "Reminiscences." The background material and the arrangement of the works underline their significance.

A New York Review Books Original *Hav* is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

This book is devoted to Quisped, Roberts, and Thompson (QRT) maps, considered as automorphisms of rational elliptic surfaces. The theory of QRT maps arose from problems in mathematical physics, involving difference equations. The application of QRT maps to these and other problems in the literature, including Poncelet mapping and the elliptic billiard, is examined in detail. The link between elliptic fibrations and completely integrable Hamiltonian systems is also discussed. The book begins with a comprehensive overview of the subject, including QRT maps, singularity confinement, automorphisms of rational elliptic surfaces, action on homology classes, and periodic QRT maps. Later chapters cover these topics and more in detail. While QRT maps will be familiar to specialists in algebraic geometry, the present volume makes the subject accessible to mathematicians and graduate students in a classroom setting or for self-study.
