

Michael R Lindeburg Fe Review Manual 3rd Edition

Provides an in-depth review of the fundamentals for the morning portion and the general afternoon portion of the FE exam. Each chapter is written by an expert in the field. This is the core textbook included in every FE Learning System, and contains SI units.

The FE exam, the first in the two-part engineering licensing process, is taken typically by upper-level students or recent graduates in April or October. This eight-hour exam is closed-book except for a handout provided in the examination room. The exam is divided into morning and afternoon sessions. The morning exam, with 120 multiple-choice problems, is the same for everyone. In the afternoon, examinees must choose to take a discipline-specific (DS) or a general exam, each with 60 multiple-choice problems. The Discipline-Specific Reviews are used to study for the afternoon DS exams.

Complement your "FE Civil Review Manual" study with these discipline-specific practice problems.

The chemical PE exam is an eight-hour, open-book test, consisting of 80 multiple-choice problems. It is administered every April and October. The Chemical Engineering Reference Manual is the primary text examinees need both to prepare for and to use during the exam. It reviews current exam topics and uses practice problems to emphasize key concepts. The Chemical Engineering Reference Manual provides a detailed review for engineers studying for the chemical PE exam, preparing them for what they will find on test day. It includes more than 160 solved example problems, 164 practice problems, and test-taking strategy.
