Shares three stories about the inner workings of the Mogodorian regime, as well as how they engineered the attack on Lorien.

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said "should be named chief myth-buster for Asian business." In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and

sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

Young Adult literature, from The Outsiders to Harry Potter, has helped shape the cultural landscape for adolescents perhaps more than any other form of consumable media in the twentieth and twenty-first century. With the rise of mega blockbuster films based on these books in recent years, the young adult genre is being co-opted by curious adult readers and by Hollywood producers. However, while the genre may be getting more readers than ever before, Young Adult literature remains exclusionary and problematic: few titles feature historically marginalized individuals, the books present heteronormative perspectives, and gender stereotypes continue to persist. Taking a critical approach, Young Adult Literature: Challenging Genres offers educators, youth librarians, and students a set of strategies for unpacking, challenging, and transforming the assumptions of some of the genre's most popular titles. Pushing the genre forward, Antero Garcia builds on his experiences as a former high school teacher to offer

strategies for integrating Young Adult literature in a contemporary critical pedagogy through the use of participatory media. In this exciting seventy-five-page prequel companion novella to the New York Times bestselling I Am Number Four series, discover the true origins of the traitorous Number Five. This book fills a gap in the historiographical and theoretical fields of race, gender, and war. In brief, *Race and Gender in Modern Western Warfare (RGMWW)* offers an introduction into how cultural constructions of identity are transformed by war and how they in turn influence the nature of military institutions and conflicts. Focusing on the modern West, this project begins by introducing the contours of race and gender theories as they have evolved and how they are employed by historians, anthropologists, sociologists, and other scholars. The project then mixes chronological narrative with analysis and historiography as it takes the reader through a series of case studies, ranging from the early nineteenth century to the Global War of Terror. The purpose throughout is not merely to create a list of so-called "great moments" in race and gender, but to create a meta-landscape in which readers can learn to identify for themselves the disjunctures, flaws, and critical synergies in the traditional memory and history of a largely monochrome and male-exclusive military experience. The final chapter considers the current challenges that Western societies, particularly the United States, face in imposing social diversity and tolerance on statist military structures in a climates of sometimes vitriolic public debate. RGMWW represents our effort to blend race, gender, and military war, to problematize these

intersections, and then provide some answers to those problems.

Of all the grave crises in Northern Ireland's history, the events of Bloody Sunday are perhaps the most notorious. The subject of an independent inquiry that is the longest and most expensive the British government has ever undertaken, this yet to be resolved issue continues to be one of the most significant events in the recent history of the Troubles. This book tackles the subject from a new angle that covers both the political and psychological aspects of what happened. Based on extensive interviews with families whose relatives were killed by British soldiers, it is a record of the trauma that they have suffered. Setting Bloody Sunday in social, political and historical contexts, the authors examine the events of the day itself, the aftermath, and the relationship between post-traumatic stress disorder, grief, mourning and storytelling. They conclude with accounts about state and community responses to the trauma, and the impact and implications of the Saville Inquiry, which has allowed family members to express publicly their stories about the events of Bloody Sunday.

Risk Criticism is a study of literary and cultural responses to global environmental risk in an age of unfolding ecological catastrophe. In 2015, the *Bulletin of the Atomic Scientists* reset its iconic Doomsday Clock to three minutes to midnight, as close to the apocalypse as it has been since 1953. What pushed its hands was not just the threat of nuclear weapons, but also other global environmental risks that the *Bulletin* judged to have risen to the scale of the nuclear, including climate change and innovations in the life sciences. If we may once have believed that the end of days would come in a blaze of nuclear firestorm, we now suspect that the apocalypse may be much slower, creeping in as chemical toxins, climate change, or nano-technologies run amok. Taking inspiration from the questions raised by the *Bulletin's* synecdochical “nuclear,” *Risk Criticism* aims to generate a hybrid form of critical practice that brings “nuclear criticism” into conversation with ecocriticism. Through readings of novels, films, theater, poetry, visual art, websites, news reports, and essays, *Risk Criticism* tracks the diverse ways in which environmental risks are understood and represented today.
