One Hundred Great Essays collects one-hundred of the most teachable and rewarding essays used in today's college composition class. The anthology combines classic, commonly taught essays with frequently anthologized contemporary essays by today's most highly regarded writers. The selections are broadly diverse in both subject matter and authorship. Essays have been selected as both models for good writing and useful springboards for student writing. An introductory section discusses the qualities of the essay form and offers instruction on how to read essays critically, and shows students how to use the writing process to develop their own essays

What an amazing career. Tom Stafford attained the highest speed ever reached by a test pilot (28,547 mph), carried a cosmonaut's coffin with Soviet Secretary Leonid Brezhnev, led the team that designed the sequence of missions leading to the original lunar landing, and drafted the original specifications for the B-2 stealth bomber on a piece of hotel stationery. But his crowning achievement was surely his role as America's unofficial space ambassador to the Soviet Union during the darkest days of the Cold War. In this lively memoir written with Michael Cassutt, Stafford begins by recounting his early successes as a test pilot, Gemini and Apollo astronaut, and USAF general. As President Nixon's stand-in at the 1971 Soviet funeral for three cosmonauts, he opened the door to the possibility of cooperation in space between Russians and

Americans. Stafford's Apollo-Soyuz team was the first group of Americans to work at the cosmonaut training center, and also the first to visit Baikonur, the top-secret Soviet launch center, in 1974. His 17 July 1975 “handshake in space” with Soviet commander Alexei Leonov (who became a lifelong friend) proved to the world that the two opposing countries could indeed work successfully together. Stafford has continued in this leadership role right up to the present, participating in designing and evaluating the Space Shuttle, Mir, and the International Space Station. He is truly an American hero who personifies the broadest spirit of exploration and cooperation.

The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere...

In this pathbreaking book, Richard D'Aveni shows how competitive moves and countermoves escalate with such ferocity today that the traditional sources of competitive advantage can no longer be sustained. D'Aveni argues that a company must fundamentally shift its strategic focus. He constructs a comprehensive model that shows how firms move up "escalation ladders" as advantage is continually created, eroded, destroyed, and recreated through strategic maneuvering in "four arenas" of competition. Using detailed examples from hypercompetitive industries such as computers, automobiles, and pharmaceuticals, D'Aveni demonstrates how hypercompetitive firms succeed by disrupting the status quo and creating a continuous series of temporary advantages. With its emphasis on real-world experiences of corporate warfare, this abridged paperback edition of D'Aveni's masterwork will be essential reading for scholars and managers alike - a perfect introduction to the battlefield of hypercompetitive rivalries.

Mechanics of Flow-Induced Sound and Vibration, Volume 1: General Concepts and Elementary Sources, Second Edition, enables readers to fully understand flow-induced vibration and sound, unifying the disciplines of fluid dynamics, structural dynamics, vibration, acoustics, and statistics in order to classify and examine each of the leading sources of vibration and sound induced by various types of fluid motion. Starting with

classical theories of aeroacoustics and hydroacoustics, a formalism of integral solutions valid for sources near boundaries is developed and then broadened to address different source types, including jet noise, flow tones, dipole sound from cylinders, and cavitation noise. Step-by-step derivations clearly identify any assumptions made throughout. Each chapter is illustrated with comparisons of leading formulas and measured data. Along with its companion, *Mechanics of Flow-Induced Sound and Vibration, Volume 2: Complex Flow-Structure Interactions*, the book covers everything an engineer needs to understand flow-induced sound and vibration. This book will be essential reading for postgraduate students, and for engineers and researchers with an interest in aerospace, ships and submarines, offshore structures, construction, and ventilation. Presents every important topic in flow-induced sound and vibration Covers all aspects of the topics addressed, from fundamental theory, to the analytical formulas used in practice Provides the building blocks of computer modeling for flow-induced sound and vibration

*Marketing Strategy and Competitive Positioning 6e* deals with the process of developing and implementing a marketing strategy. The book focuses on competitive positioning at the heart of marketing strategy and includes in-depth discussion of the processes used in marketing to achieve competitive advantage. The book is primarily about creating and sustaining superior performance in the marketplace. It focuses on the two central issues in marketing strategy formulation – the identification of target

markets and the creation of a differential advantage. In doing that, it recognises the emergence of new potential target markets born of the recession and increased concern for climate change; and it examines ways in which firms can differentiate their offerings through the recognition of environmental and social concerns. The book is ideal for undergraduate and postgraduate students taking modules in Marketing Strategy, Marketing Management and Strategic Marketing Management.
