based assessment (SBA) in a public examination. In part 1, Griffith offers the history and context for the exploration of the issues of SBA in a public examination and reviews the history and concept of public examinations and the evolution and mandate of the Caribbean Examinations Council as a public examinations board serving member countries of the region. In part 2, he provides the foundations for a discourse of the concept, theory and practice of SBA in the context of the public examinations of the Caribbean Examinations Council and explores key issues in SBA in a public examination. In part 3, he examines a number of new directions and practices related to SBA in a public examination, for example, the use of an alternative (external) paper to assess the same competencies developed and assessed in the SBA undertaken in schools, the implementation and assessment of group work in SBA, the use of a single project for the SBA of a cluster of subjects, and ways in which the benefits of SBA in a public examination may guide practice at all levels of the education system to improve student learning and assessment."There is a need to present the valuable work of the CXC in a way that stakeholders can understand it. . . . Griffith discusses the challenges that the examination board faces with regard to the school-based assessments as well as the alternative to the school-based assessment, and recommends strategies and procedures to deal with the challenges. He presents sound discussions . . . [and] shows knowledge and understanding of current thinking in the field."--James A. Halliday, School of Education, University of the West Indies, Cave Hill, Barbados"The work makes a solid contribution to the growing body of literature on the CXC's school-based assessment . . . [and] demonstrates a high level of scholarship through the writer's obvious knowledge and understanding and insightful analysis and arguments presented. This analysis is applied with

This book reflects on science education in the first 20 years of the 21st century in order to promote academic dialogue on science education from various standpoints, and highlights emergent new issues, such as education in science education research. It also defines new research agendas that should be “moved forward” and inform new trajectories through the rest of the century. Featuring 21 thematically grouped chapters, it includes award-winning papers and other significant papers that address the theme of the 2018 International Science Education Conference.

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses

current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the

practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? CSEC English syllabus effective for the May - June 2018 examinations. It was developed in response to requests of teachers and students to have resources, validated by CXC, to assist them in completing the SBA. The activities in this Workbook will allow the teachers to more efficiently and effectively integrate the SBA in every day classroom activities. At the end of each group meeting, there is a Group Meeting Participation Form for students to complete. This form allows the teacher to monitor what happens outside the classroom as well. It also allows the students to have evidence to support their declarations in discussing their individual participation and group participation. The Workbook also incorporates activities which will help students to successfully complete the required tasks. The activities scaffold the thinking that will be required to complete the final tasks. The step by step approach makes the overall process easier. Finally, the Workbook contains sample SBAs. One is used as a working example to show how each task is supposed to be completed. The working sample also includes guidelines for completion. The other sample at the end of the Workbook was included to give students a clearer idea of how their final portfolio should be compiled. It was also included to show how students can work within the same theme/issue/topic/event and write the same written report but have different individual pieces. The SBA component provides a unique opportunity for students to improve their competence and achievement in English. It is my hope that School Based Assessment in English: A guide and workbook for students will make that opportunity more a reality.
