you overcome fear and anxiety, regain happiness, and feel more calm within. Competent, spiritual people suffer from anxiety and depression too: Spiritual people often find that their own expectations of living a life dedicated to a higher power makes them more susceptible to high-functioning anxiety. Sometimes, traditional relaxation techniques either do not work, don't last, or, in some cases, actually increase their anxiety. The missing keys to managing anxiety: Psychotherapist, yoga teacher, and interfaith minister Rev. Connie L. Habash shows us a way to transform our perceptions using mindful awareness, in order that we may live divinely inspired lives. In over 25 years as a counselor helping spiritual people overcome anxiety, Rev. Connie has taught that it takes more than chanting mantras, stretching, or relaxation techniques to calm anxiety. It requires a transformation in perception, moment-to-moment body awareness, and a conscious response to thoughts and emotions. Awakening from Anxiety provides valuable psycho-spiritual tools to deepen spiritual awakening and calm fears:

- Learn what anxiety is and when it becomes a problem
- Understand the 6 mistakes spiritual people make that increase anxiety
- Discover the 7 keys to a more calm, confident, courageous life
- Know how to break through the old patterns of stress, worry, and fear into a new perception of your true self

If you enjoyed Stop Anxiety from Stopping You and First, We Make the Beast Beautiful, Awakening from Anxiety will take your healing and renewal from anxiety to the next level.

Also included in this edition: *Fight NOT Flight: The Key to Preventing Panic Attacks* Most people are aware of the fight or flight response. It's the term we use when we refer to our primitive survival instinct. When we feel threatened, our fight or flight response kicks in, and makes us either want to fight the perceived threat, or else take flight from it. When it comes to anxiety, you can forget about fight. Whenever you feel anxious, it's because flight response chemicals are being released into your mind/body system. Let's flip the coin from Flight to Fight The word 'fight' brings with it a world of

negative overtones. However, when it's used in the context of overcoming anxiety, it refers to flipping the coin from flight over to fight, and utilising the resulting pro-active (feel-good endorphins) to defeat anxiety. The ability to do so is a life changer, providing the confidence to enter any situation (or face up to painful memories) knowing you have the skills at your disposal to stop any resulting anxiety in its tracks. This short book provides the easy to learn, physical skills you need to achieve this from today onwards. I developed the skills you're about to learn as a means of overcoming my own battles with anxiety, and then went on to teach them to clients who visited my clinic in London from afar as far as the USA and Australia.

Picking up where *Quiet* ended, *How to Be Yourself* is the best book you'll ever read about how to conquer social anxiety. "This book is also a groundbreaking road map to finally being your true, authentic self." —Susan Cain, *New York Times*, *USA Today* and nationally bestselling author of *Quiet* Up to 40% of people consider themselves shy. You might say you're introverted or awkward, or that you're fine around friends but just can't speak up in a meeting or at a party. Maybe you're usually confident but have recently moved or started a new job, only to feel isolated and unsure. If you get nervous in social situations—meeting your partner's friends, public speaking, standing awkwardly in the elevator with your boss—you've probably been told, "Just be yourself!" But that's easier said than done—especially if you're prone to social anxiety. Weaving together cutting-edge science, concrete tips, and the compelling stories of real people who have risen above their social anxiety, Dr. Ellen Hendriksen proposes a groundbreaking idea: you already have everything you need to succeed in any unfamiliar social situation. As someone who lives with social anxiety, Dr. Hendriksen has devoted her career to helping her clients overcome the same obstacles she has. With familiarity, humor, and authority, Dr. Hendriksen takes the reader through the roots of social anxiety and why it endures, how we can rewire our brains through our behavior, and—at long last—exactly how to quiet your Inner Critic, the pesky voice that whispers, "Everyone will judge you." Using her techniques to develop confidence, think through the buzz of anxiety, and feel comfortable in any situation, you can finally be your true, authentic self.

The very things we do to control anxiety can make anxiety worse. This unique guide offers a cognitive behavioral therapy (CBT)-based approach to help you recognize the constant chatter of your anxious “monkey mind,” stop feeding anxious thoughts, and find the personal peace you crave. Ancient sages compared the human mind to a monkey: constantly chattering, hopping from branch to branch—endlessly moving from fear to safety. If you are one of the millions of people whose life is affected by anxiety, you are familiar with this process. Unfortunately, you can't switch off the “monkey mind,” but you can stop feeding the monkey—or stop rewarding it by avoiding the things you fear. Written by psychotherapist Jennifer Shannon, this book shows you how to stop anxious thoughts from taking over using proven-effective cognitive behavioral therapy (CBT), acceptance and commitment therapy (ACT), and mindfulness techniques, as well as fun illustrations. By following the exercises in this book, you'll learn to identify your own anxious thoughts, question those thoughts, and uncover the core fears at play. Once you stop feeding the monkey, there are no limits to how expansive your life can feel. This book will show you how anxiety can only continue as long as you try to avoid it. And, paradoxically, only by seeking out and confronting the things that make you anxious can you reverse

From a leading writer on anxiety management, a timely and urgent book on navigating the “new normal.” With the global pandemic, our world changed seemingly overnight. Nobody knows when normalcy will return. Uncertainty engenders anxiety, so it isn’t surprising that now, without exaggeration, we can say that the world is seeing a new face of anxiety: fear of grocery stores or friendly strangers standing nearby on a hiking trail; fear of returning to offices as “the Great Pause” transitions to re-emerging work life; fear of sending our children back to school. This new anxiety also masks real experiences of grief and loss, making them unmanageable and, therefore, hard to navigate. Margaret Wehrenberg, one of our most sensitive anxiety writers, offers context and strategies for dealing with the bewildering state of life today. With her trademark combination of neurobiological context, practical suggestions, and engaging stories, Wehrenberg provides readers just what is needed in these uncertain times: a way to deal with unprecedented challenges and the realities of the world as it is now.

author of Parenting the New Teen in the Age of Anxiety Dr. Helen Odessky describes what she has learned in fifteen years of helping people face their fears. Learn to face your fears and attain greater opportunities in your relationships, career, and life. Value good fear. Sometimes fear can be helpful. A few years ago, Dr. Helen Odessky, licensed clinical psychologist, anxiety expert, speaker, and author of the best-selling motivational book Stop Anxiety from Stopping You, found herself part of a minor fender-bender on a major interstate. Looking back at her daughter, she feared that if another car hit them, her daughter's life would be in danger. A few minutes after retreating to another car in a safer location, an 18-wheeler barreled into her car and demolished it. Her fear saved both her daughter's life and her own. Fight bad fear. Stop Fear from Stopping You is about a different type of fear—the fear that is so prevalent that it often lies dormant—destroying dreams, career paths and relationships. Bad fear creates stories that cushion us from potential pain and failure—at the cost of our self-esteem, success, and personal happiness. Become fear-wise. Because fear is complex, we cannot afford to merely be fearless. Just "letting go" is not the answer. The real solution lies in learning to become fear-wise. In this inspirational book, Dr. Helen shows you how to harness the wisdom behind your fears and break through the barriers that block your success.

- Identify the fears that stand between you and your goals
- Develop tools to overcome your fears
- Develop a value-based plan to pursue your goals
- Change your relationship with fear and learn to become fear-wise

If self-help books for women and men like The Confidence Gap, Daring Greatly, or Fearless inspired you, then Stop Fear from Stopping You is a must-read.

If you or someone you love suffers from excessive worry, anxiety, panic, OCD, or phobias, you know how crippling it can be. Of course, worry can be an important asset when it forces our attention on problem-solving. But anxious worrying can cause us to unnecessarily focus on a threat, to retreat and avoid, and to seek reassurance and safety—which is no way to foster a life of growth and excitement. In his fifth published book, Dr. Reid Wilson proposes a groundbreaking, paradoxical approach to overcoming anxiety, worry, OCD, panic, and phobias by moving away from comfort, confidence, and security and willingly moving toward uncertainty, distress and discomfort. Through the use of unconventional strategies, readers will learn how to confront anxiety head-on and step forward into the face of threat. Drawing on a range of sources—from firefighters and fitness instructors to Sir Isaac Newton and Muhammad Ali—Stopping the Noise in Your Head: The New Way to Overcome Anxiety and Worry demonstrates the importance of shifting our perspective and stepping toward our challenges in order to regain control of our lives.

The instant New York Times bestseller A step-by-step plan clinically proven to break the cycle of worry and fear that drives anxiety and addictive habits We are living through one of the most anxious periods any of us can remember. Whether facing issues as public as a pandemic or as personal as having kids at home and fighting the urge to reach for the wine bottle every night, we are feeling overwhelmed and out of control. But in this timely book, Judson Brewer explains how to uproot anxiety at its source using brain-based techniques and small hacks accessible to anyone. We think of anxiety as everything from mild unease to full-blown panic. But it's also what drives the addictive behaviors and bad habits we use to cope (e.g. stress eating, procrastination, doom scrolling and social media). Plus, anxiety lives in a part of the brain that resists rational thought. So we get stuck in anxiety habit loops that we can't think our way out of or use willpower to overcome. Dr. Brewer teaches us map our brains to discover our triggers, defuse them with the simple but powerful practice of curiosity, and to train our brains using mindfulness and other practices that his lab has proven can work. Distilling more than 20 years of research and hands-on work with thousands of patients, including Olympic athletes and coaches, and leaders in government and business, Dr. Brewer has created a clear, solution-oriented program that anyone can use to feel better - no matter how anxious they feel.
