The objective of the workshops associated with the ER'99 18th International Conference on Conceptual Modeling is to give participants access to high level presentations on specialized, hot, or emerging scientific topics. Three themes have been selected in this respect: — Evolution and Change in Data Management (ECDM'99) dealing with han dling the evolution of data and data structure, — Reverse Engineering in Information Systems (REIS'99) aimed at exploring the issues raised by legacy systems, — The World Wide Web and Conceptual Modehng (WWWCM'99) which ana lyzes the mutual contribution of WWW resources and techniques with con ceptual modeling. ER'99 has been organized so that there is no overlap between conference ses sions and the workshops. Therefore participants can follow both the conference and the workshop presentations they are interested in. I would like to thank the ER'99 program co-chairs, Jacky Akoka and Mokrane Bouzeghoub for having given me the opportunity to organize these workshops. I would also like to thank Stephen Liddle for his valuable help in managing the evaluation procedure for submitted papers and helping to prepare the workshop proceedings for publication. This anthology focuses on the writing process itself and on fundamentals of compositional

theory. Essays explore the psychology of composition, research on writing anxiety, the relationship of literary theory to composition, and reading theory as it relates to the composing process. The historical development of research methodologies in the field is examined, with particular emphasis on evaluation methods and construction of effective writing sequences and assignments. With recent educational trends toward basic writing, even teachers of the most advanced composition classes will welcome the contributions on sentence structure, spelling, punctuation, paragraphs, and volcabulary development. The essays that place composition within larger intellectual traditions will be particularly valuable to scholars currently extending their research into other disciplines. Two appendixes on text books and evaluation are designed to help composition educators and scholars select useful, innovative texts and handbooks.

The world-renowned classic that has enthralled and delighted millions of readers with its timeless tales of gods and heroes. Edith Hamilton's mythology succeeds like no other book in bringing to life for the modern reader the Greek, Roman and Norse myths that are the keystone of Western culture-the stories of gods and heroes that have inspired human creativity from antiquity to the present. We follow the drama of the Trojan War and the wanderings of Odysseus. We hear the tales of Jason and the Golden Fleece, Cupid and Psyche, and mighty King Midas. We discover the origins of the names of the constellations. And we recognize reference points for countless works for art, literature and culture inquiry-from Freud's Oedipus complex to Wagner's Ring Cycle of operas to Eugene O'Neill's Mourning Becomes Electra Both a reference text for scholars of all ages and a book to simply enjoy, Mythology is a classic not to be missed.
Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results). Presents a list of topics for student research projects, with symbols indicating the level of difficulty and likelihood of finding materials in the library.

Adventures of Huckleberry Finn (often shortened to Huck Finn) is a novel written by American humorist Mark Twain. It is commonly used and accounted as one of the first Great American Novels. It is also one of the first major American novels written using Local Color Regionalism, or vernacular, told in the first person by the eponymous Huckleberry "Huck" Finn, best friend of Tom Sawyer and hero of three other Mark Twain books.The book is noted for its colorful description of people and places along the Mississippi River. By satirizing Southern antebellum society that was already a quarter-century in the past by the time of publication, the book is an often scathing look at entrenched attitudes, particularly racism. The drifting journey of Huck and his friend Jim, a runaway slave, down the Mississippi River on their raft may be one of the most enduring images of escape and freedom in all of American literature.
