This book tells an ethnographic story of a secret literary culture that has recently emerged from its cocoon. Until 2012, Myanmar (also known as Burma) was ruled for fifty years by one of the most paranoid and repressive censorship regimes in history. The military junta enforced strict reading and writing restrictions in line with their ideology, feared writers' potential to trigger change, and did their best to keep Western books and influences out of the country. As part of an unexpected move toward democracy, the government has recently lifted the worst restrictions on reading and writing, giving rise to a new era in the country's literature and literary culture. While living in Myanmar in 2013, Ellen Wiles sought out the best of its contemporary writers and writing to begin uncovering the country's remarkable literary life and history. This book contains the experiences and recent output of nine Myanmar writers spanning three generations, featuring interviews and English-language translations of their work, along with political, legal, and artistic explorations. It includes men and women, fiction and poetry, reflecting the ripples of political and cultural change as they have moved across different groups and genres. A rare portrait of a people and place in transition, Wiles's work contributes both to the study of literature and culture in Myanmar and to the general study of art under censorship.

Every president has had a unique and complicated relationship with the intelligence community. While some have been coolly distant, even adversarial, others have found their intelligence agencies to be among the most valuable instruments of policy and power. Since John F. Kennedy's presidency, this relationship has been distilled into a personalized daily report: a short summary of what the intelligence apparatus considers the most crucial information for the president to know that day about global threats and opportunities. This top-secret document is known as the President's Daily Brief, or, within national security circles, simply "the Book." Presidents have spent anywhere from a few moments (Richard Nixon) to a healthy part of their day (George W. Bush) consumed by its contents; some (Bill Clinton and George H. W. Bush) consider it far and away the most important document they saw on a regular basis while commander in chief. The details of most PDBs are highly classified, and will remain so for many years. But the process by which the intelligence community develops and presents the Book is a fascinating look into the operation of power at the highest levels. David Priess, a former intelligence officer and daily briefer, has interviewed every living president and vice president as well as more than one hundred others intimately involved with the production and delivery of the president's book of secrets. He offers an unprecedented window into the decision making of every president from Kennedy to Obama, with many character-rich stories revealed here for the first time.

"A book for the ages." —Los Angeles Times Book Review Four Days in November is an extraordinarily exciting, precise, and definitive narrative of the assassination of President John F. Kennedy on November 22, 1963, by Lee Harvey Oswald. It is drawn from Reclaiming History: The Assassination of President John F. Kennedy, a monumental and historic account of the event and all the conspiracy theories it spawned, by Vincent Bugliosi, legendary prosecutor of Charles Manson and author of Helter Skelter. For general readers, the carefully documented account presented in Four Days is utterly persuasive: Oswald did it and he acted alone.

The #1 True Crime Bestseller of All Time—7 Million Copies Sold In the summer of 1969, in Los Angeles, a series of brutal, seemingly random murders captured headlines across America. A famous actress (and her unborn child), an heiress to a coffee fortune, a supermarket owner and his wife were among the seven victims. A thin trail of circumstances eventually tied the Tate-LeBianca murders to Charles Manson, a would-be pop singer of small talent living in the desert with his "family" of devoted young women and men. What was his hold over them? And what was the motivation behind such savagery? In the public imagination, over time, the case assumed the proportions of myth. The murders marked the end of the sixties and became an immediate symbol of the dark underside of that era. Vincent Bugliosi was the prosecuting attorney in the Manson trial, and this book is his enthralling account of how he built his case from what a defense attorney dismissed as only "two fingerprints and Vince Bugliosi." The meticulous detective work with which the story begins, the prosecutor's view of a complex murder trial, the reconstruction of the philosophy Manson inculcated in his

fervent followers...these elements make for a true crime classic. Helter Skelter is not merely a spellbinding murder case and courtroom drama but also, in the words of The New Republic, a "social document of rare importance." Some images in this ebook are not displayed due to permissions issues.

Is culture simply a more or less set text we can learn to read? Since the early 1970s, the notion of culture-as-text has animated anthropologists and other analysts of culture. Michael Silverstein and Greg Urban present this stunning collection of cutting-edge ethnographies arguing that the divide between fleeting discursive practice and formed text is a constructed one, and that the constructional process reveals "culture" to those who can interpret it. Eleven original essays of "natural history" range in focus from nuptial poetry of insult among Wolof griots to case-based teaching methods in first-year law-school classrooms. Stage by stage, they give an idea of the cultural processes of "entextualization" and "contextualization" of discourse that they so richly illustrate. The contributors' varied backgrounds include anthropology, psychiatry, education, literary criticism, and law, making this collection invaluable not only to anthropologists and linguists, but to all analysts of culture.
